

HEAVY SAFETY. MULTIPLE CONFIGURATIONS. **SLIM PACKAGE.**

INTRODUCING THE COMPACT, EASILY PORTABLE SLIM SAFETY BARRIER

Trim down your maintenance operations with a more flexible, space-saving barrier. It's lightweight, small carrying size make the Slim Safety Barrier from Adams ideal for today's downsized service vehicles. The barriers feature a convenient shoulder strap, a full flat-bottom edge, suction cups and a flexible multi-panel, accordion-fold configuration.

With an expanded Slim Safety Barrier product line, service providers can now benefit from barrier assemblies of six, seven, eight and nine 16-inch panel configurations to match individual needs. Other product line updates include added locking pins in the standard 42-inch tall models to improve overall stability as well as an innovative double-height 84-inch panel option, available in all four configurations. What's more, durable construction means you don't have to sacrifice rigidity for convenience.

Lower costs without sacrificing safety with an alternate design featuring 31-inch wide and 42-inch tall interlocking ECONO panels. For more information about how the Slim Safety Barrier can meet your specific requirements, please call Adams to learn about what different options will benefit you the most.
