

SURGE PROTECTION SYSTEMS

Avoid disruption and costly repairs to electrical and electronic components with the Surge Protection Systems. Packaged specifically for Schindler 3300 and 5500 elevators, the Surge Protection Systems offer multiple levels of protection against voltage spikes from most lightning strikes or power grid faults. Surge Protection Systems provide protection from the 3-phase input to the controller, all the way through medium-voltage power supply (120VAC, 230VAC) and low-voltage protection (24VDC, 5VDC) for printed circuit boards.

PART NUMBERS

HA-2-SP01; Surge Protection – 3300 – 240v (KD)
HA-2-SP02; Surge Protection – 3300 – 480v (KD)
HA-2-SP03; Surge Protection – 5500 – 240v (KD)
HA-2-SP04; Surge Protection – 5500 – 480v (KD)

Wiring instructions for Schindler 3300 and 5500 elevator systems are included with each kit.

Kits are designed specifically for the elevator systems listed. Other systems will be offered in the future.

The Surge Protection Systems are not available for purchase from the online store. For a quote or to place an order, call us at **1-800-929-9247** or email adams.sales@adamselevator.com.
